

netstream[®]

Networking On A Budget

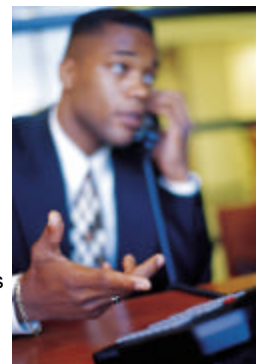

You owe it to yourself to try netstream[®], Risk Free, before you buy anything else!

The Affordable “I Want It All” Business Solution!

netstream[®] is a revolutionary data and Internet solution that allows your business to have all the features of a large business computer network – at an affordable price. With netstream[®] you can:

- Share your files and other expensive resources, like printers, with other users in your office.
 - Customize company email and host your own website. You can have email using your very own domain name (**bob@yourcompany.com**). You can also have your own website with your very own domain name (**www.yourcompany.com**). If you don't have a registered domain name, our staff will create and professionally manage one for you.¹
 - netstream[®] Mail™, allows you to access your email from anywhere in the world using a standard Internet browser.
 - Access your desktop computer while you are away from the office. You have the freedom to work from home or on the road.
- Take advantage of all the wonderful features of the Internet and prevent unauthorized users from accessing your network with a hardened firewall.
 - Protect your desktop computers, shared files and emails from harmful viruses.
 - Protect your desktop computers from damaging spyware.
 - Virtually eliminate those annoying junk emails you would rather not receive.
 - Control access to offensive Internet destinations with web content filtering.
 - Help protect your shared data with data backup solutions that allow you to recover lost or damaged data.²
 - The netstream[®] staff will professionally manage your local area network. Critical network services are monitored remotely. Should a problem arise, our staff will immediately begin working to solve your problem.
 - Professional administration of your local area network. Daily activities like monitoring network performance, adding and removing users, updating antiviral definitions, security monitoring of your network, and many other routine tasks are taken care of by the netstream[®] staff. This frees you up to do what you do best – taking care of your business.
 - Professional reporting of email utilization, Internet access, network utilization, virus attacks, network health and other vital information about your local area network.

- netstream® can save you thousands of dollars in hardware, software and support costs compared to traditional computer network and Internet solutions. All required hardware and software for netstream® service is provided.
- netstream® frees you to manage your business. You do not have to be a network guru or dedicate someone from your staff to provide support for your local area network. The netstream® staff becomes your support staff.
- netstream® is extremely affordable.
- netstream® does not add to your tax liability. At tax time, you do not have to depreciate expensive hardware and software.³
- There is no risk. If you are not completely satisfied during the first 30 days, return any netstream® equipment, and your money will be refunded.⁴
- No long term commitment is required. Cancel your netstream® service at any time.⁵
- The netstream® staff provides professional management and monitoring of your network, maximizing your productivity.

DON'T NETWORK, NETSTREAM®!

Traditionally, you would spend thousands of dollars purchasing hardware and software to get all the features included with netstream®. You and your staff would have to dedicate days or weeks to properly deploy your new network. You would have to allocate someone from your staff to deal with common network issues, which would take them away from their normal responsibilities - costing you money. For issues you cannot handle yourself, you would hire an IT vendor, again costing you more money.

netstream® is a service. There

is no equipment to buy. The netstream® staff is your full-time, professional IT staff. When network issues arise, netstream® takes care of them. Since netstream® provides full time professional monitoring of network health, problems are often taken care of before you even notice them. This allows your entire staff to focus on running your business, which saves you valuable time and money.

netstream® also insures that there is no risk to you. No long term contracts are required. No expensive hardware purchases. No

expensive technicians. If you are not completely satisfied with netstream®, you can cancel at any time. Plus, during the first 30 days, if you are not satisfied that netstream® is everything you need, cancel your service and your money will be refunded.⁴

¹ Additional fees may be required by Internet registrars.

² Ultimately, data backup is the responsibility of the customer.

³ Check with your accountant.

⁴ Third-party domain registration fees are non-refundable.

⁵ 30 days notice and return of netstream® equipment required.

Requirements:

A dedicated Internet connection with a static IP address

A Local Area Network (LAN)
